**Grace Chiang** is one part fearless creative, one part meticulously methodical idea architect. A multi-hyphenate individual, she is equally a songwriter, music producer, audio engineer and artist. Existing in a perpetual state of melancholic existentialism, she paints the world with introspection wrapped up in an alternative R&B/pop sound featuring luscious harmonies and midtempo hip-hop inspired beats. Her essence is of one who grapples with a fractured sense of self and the discord between belief and reality. Never satisfied and ever evolving, you will find her pushing the boundaries of music, thought, and self-expression.
